PROFESSIONAL SUMMARY

Full-Stack Developer and AI Specialist intern at Memphis Tours (since October 2026), passionate about building production-grade AI-integrated systems — from ML-powered forecasting to LLM-driven features. B.Sc. in Electrical Engineering — Computer Science & Systems (Ain Shams University, 2024), with 13 AI/ML certifications from Stanford, DeepLearning.AI, and IBM. Interested in machine learning, LLM applications, and full-stack engineering, and looking for a role where I can build real-world AI-driven products.

TECHNICAL SKILLS

- **Languages:** Python, TypeScript, JavaScript, SQL
- **Machine Learning & AI:** TensorFlow, PyTorch, Scikit-learn, XGBoost, OpenCV, LLMs/RAG, NLP, Computer Vision
- **Web Development:** React, Vite, Tailwind CSS, REST APIs, Django/DRF, FastAPI, Node.js
- **MLOps & Tools:** Docker, PostgreSQL, Git, Linux, CI/CD, Model Deployment

EXPERIENCE

AI Specialist (Intern) 10/2026 – Present

Memphis Tours

PHP, Python, FastAPI, scikit-learn, multilingual embeddings, Gemini, MySQL, pytest

- **Messenger AI sales assistant (pilot):** built an ERP pricing client and price tool so every quote is totalled in code, plus a reply check that removes any amount the ERP did not supply. Added a human review of first quotes, a language-detection fix, and a rule that sends Messenger leads to the ERP.
- **Request spam detector (shadow mode):** built a multilingual embeddings classifier for inbound travel requests, tuned for precision so real clients are not flagged. Evaluated with a time-based split, a sealed test set and a fairness audit across script, channel and country.
- **SalesAI draft emails and itinerary offers:** worked on the draft-email pipeline with a deterministic output gate, and on the package-offer builder, where code writes dates, prices and itineraries and the model may only re-word the voice, never the facts.

Machine Learning & Full-Stack Development 12/2025 – Present | Cairo, Egypt

Independent Technical Specialization

- Pursued a full-time, intensive specialization in Machine Learning and Deep Learning immediately after completing mandatory military service in December 2025, earning 13 certifications from Stanford, DeepLearning.AI, and IBM.
- Designed, built, and deployed multiple full-stack and machine learning projects end-to-end — from data pipelines and model training to containerized production deployment (see Projects).

PROJECTS

PizzaStore — AI-Powered Restaurant Management System 07/2026

FastAPI, React, TypeScript, PostgreSQL, XGBoost, Gemini API, Docker | GitHub | Live Demo

- Built a full-stack restaurant platform with JWT auth and role-based access (Admin, Manager, Cashier); deployed on Railway/Vercel with Supabase PostgreSQL.
- Trained an XGBoost demand forecasting model on 48,000 orders (MAE 1.74) and built a natural-language SQL query interface using Gemini with three-layer security.

Clinic System 06/2026

Django, DRF, React, TypeScript, PostgreSQL, Gemini API, PWA | *GitHub* | *Live Demo*

- Built a mobile-first clinic management PWA with JWT auth across five roles; implemented patient records, appointment booking, and invoicing.
- Added AI features (multi-turn triage chat, medical report summarization, OCR) and shipped as an installable, offline-capable PWA on Railway.

FraudWatch AI — Real-Time Credit Card Fraud Detection 04/2026

Python, FastAPI, XGBoost, ONNX Runtime, React, TypeScript, Docker | *GitHub* | *Live Demo*

- Built an end-to-end fraud detection platform on the ULB/Kaggle dataset (~0.17% fraud rate) with a time-based train/test split to avoid leakage.
- Trained an XGBoost + Isolation Forest ensemble (75% recall / 85% precision), served via ONNX Runtime with a FastAPI backend and React dashboard.

EDUCATION

Bachelor of Science in Electrical Engineering — Computer Science & Systems 2019 – 09/2024

Ain Shams University | Cairo, Egypt

Very Good — Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Software Design, Operating Systems, Computer Networks, Database Systems, Digital Signal Processing

CERTIFICATIONS

- **Stanford & DeepLearning.AI** — Machine Learning Specialization: Supervised ML, Advanced Learning Algorithms, Unsupervised Learning/Recommenders/RL (3 courses) | 12/2025 – 01/2026
- **DeepLearning.AI** — Neural Networks and Deep Learning | 02/2026
- **IBM** — Machine Learning & Deep Learning Foundations: Machine Learning with Python, Neural Networks with Keras, Deep Learning with Keras/TensorFlow, Neural Networks with PyTorch, Deep Learning with PyTorch (5 courses) | 03/2026 – 04/2026
- **IBM** — Generative AI & Capstone: Architecture & Data Preparation, Foundational Models for NLP, AI Capstone Project (3 courses) | 05/2026 – 06/2026
- **KodeKloud** — Docker Training Course for the Absolute Beginner | 04/2026
- **Digital Egypt Youth Program (MCIT / NTI)** — Machine Learning for Data Analysis: 90 technical hours plus 30 freelancing hours, score 97% | 02/2026 – 04/2026
